Nutrifrance A family story...

Nutrifrance was founded on November 8, 1991. The founders' objectives were simple: to enjoy their work, to choose positions that suited each individual's talents, and finally, to create food products the way they were made before the food industry was flooded with artificial products and other substitutes.

This family business specializes in manufacturing exceptional quality frozen bakery products, without compromising on taste and without the addition of preservatives, colorings, or sulfites.

These doughs are used to prepare muffins, cakes, cookies, nutritious snacks, and more. Always at the forefront of new food trends, Nutrifrance distinguishes itself from the competition by offering nutritious and delicious products.

The factory employs around thirty people and can produce up to 15,000 kg of cake batter, 3,500 kg of cookie dough, and simultaneously bake 21,600 cookies per day. Nutrifrance offers a wide range of delicious products.
